

DB1000 SERIES DIGITAL INDICATING CONTROLLER

The DB1000 series is a 96×96mm digital indicating controller with the indicating accuracy of $\pm 0.1\%$ and the control cycle of approximately 0.1 seconds. Various functions including universal input and multiple setting values (8 types) are provided as standard.

■ FEATURES

● Large easy-to-view 5-digit display

Process value (PV) and set value (SV) are displayed by large easy-to-view 5-digit display indicators. The resolution of 0.1°C is enabled for more than 1000°C .

● Highly-functional operation screen and settings screen

The controller inherits the operation screen and the settings screen adopting the LCD (liquid-crystal-display) which has been familiarized for long time. Furthermore, the screens have become high-definition and highly sophisticated.

● Outstanding controllability

Two types of PID algorithms, the position-type PID algorithm and the speed-type PID algorithm, have been installed. You can select the optimum PID algorithm for an object controlled.

● Operability inheriting previous models

The controller inherits the settings screen which has been familiarized for long time. You can set up it with operation which is not different from previous models. The performance of touching-keys has been improved and the outstanding operability has been realized.

● High-precision remote signal input and transmission signal output

The high-precision (0.1% of full scale) analog remote signal input and the analog transmission signal output can be added.

● 24V power supply voltage type available

The power supply voltage 24V (AC/DC) type, which is advantageous in respect of safe, is available.

● Motor feedback value indication enabled in ON-OFF servo output type

[Operation screen of the ON-OFF servo output type]

Simultaneous indications of ON/OFF status of output, control output value (MV) and motor feedback value have been realized.

● Universal input

Various measurement ranges of DC voltage (up to maximum 10V) inputs, DC current input, thermocouple inputs and resistance thermometer inputs have been built-in.

● 2 colors of casing available

You can select the color of casing from 2 colors of gray with OA equipment feeling and black with high-class feeling.

● Conforming to international safety standards and European directives (CE)

The controller is in conformity with European directives (CE), and is UL and c-UL approved.

● Conforming to RoHS

The controller is an environmental consideration product which does not contain directed hazardous substances such as lead, etc.
